This is a small covert GPS Data logger pocket sized GPS tracking device receives signals from the twenty-four GPS satellites orbiting the earth. The new advanced internal processor accurately determines the location of the device within 2.5 meters and offers user programming to determine the time increments of how often a "data read" will be recorded and stored on the unit. Users can accurately determine where a vehicle has traveled, and how fast they drove, where they stopped and for how long. The data recorded is store on a internal Flash memory and can be later downloaded to an PC and then displayed over a street map, satellite images, or in a text report, using the included software. This miniature unit is weather resistant and has a magnetic mount on the housing for easy deployment.

## Specifications

Up to 100 Hours of Data

Motion Activated for power conservation

In motion it records a position every second

Unit goes into sleep mode when vehicle is stationary

Magnet mount

Powered by 2 AAA batteries (Batteries not included)

Water Resistant

USB connector

Size: 3.80" x 1.46" x 1.34"

## Includes

- 1 Mini Tracker USB Key
- Software CD w/ U.S. street maps
- USB extension cable
- Screwdriver
- Manual
- Hard Case

- 1 - Hour 4 - Weeks 6 - Weeks
- 2 - Hours 2 - Weeks 3 - Weeks
- 4 - Hours 1 - Week 1.5 Weeks

Estimated Battery Life 2- AAA Batteries		
Driving Hours - Per Day	Battery Life (Alkaline)	Battery Life (Lithium)
1 hour	4 weeks	6 weeks
2 hour	2 weeks	3 weeks
4 hour	1 week	1.5 weeks

Times may vary depending on quality of batteries used.

## Includes

- 1 Mini Tracker USB Key
- Software CD w/ U.S. street maps
- USB extension cable
- Screwdriver
- Manual
- Hard Case
